June 21, 1999

Dear Chairman Kennard and Members of the Commission:

In reference to MM Docket 99-25, I am opposed to the possible rulemaking activity surrounding the allowance of low power FM radio service (LPFM) .

With the hundreds of small community and community-oriented radio stations across the country now, there is always time made for all populations. Not to sound bold, but the idea that this form of communication would help minorities does not make sense. There is plenty of airtime on current stations for that purpose.

Technically, frequency battle would be a problem, as interference is sure to happen within frequencies.

As a news director, this is especially a tight issue, due to the fact that our listeners have just a few short minutes a day to keep caught up with local news. As a community-oriented station, I feel our listeners and those of other stations would be truly not serviced well.

Sincerely,

Rob Lee
News Director
